

### EMA Aesthetics

At EMA Aesthetics we believe that life is an art and everything we do embraces that art. Our approach is avant-garde designed to challenge the status quo. We focus on combination therapy that enhances aesthetic procedures. Results over sentiment.

At EMA Aesthetics we regard customers as our partners. Working together, we provide best-in-class aesthetic solutions that yield beautiful returns and stunning aesthetic results.

EMA Aesthetics is proud to introduce Préime - the latest innovation in aesthetics.

### Préime

It is said that beauty is in the eye of the beholder, Préime challenges that view as we believe that each and every individual can be beautiful in their own power. The empowerment of Bold Beauty, which encourages each individual to be the best version of themselves is the very core of Préime.

We listened to today's 'bold' beauties and discovered who they are and what they want from a skincare brand. We discovered that the world of beauty and the perception of what is considered 'beautiful' is changing. Classical beauty remains, but empowering men and women to be the best version of themselves is of critical importance. Inspired by their stories and needs, we brought these most important ingredients into the lab to create the most innovative skincare range that is packed with power and backed by science.

The name Préime represents high quality, value and results.

**#Bold Beauty, Powered By Science.**

### Sinclair

Sinclair directly employs over 500 people, operating from Corporate headquarters in London with administration conducted from offices in Chester, UK. Energy-based devices are headquartered in Barcelona, with central marketing in Paris and sales offices in Shanghai, Sao Paulo, Mexico City, Bogota, Seoul, London, Paris, Madrid, Barcelona, Milan, Warsaw, Heidelberg, Dubai and Moscow.

Sinclair has a portfolio of differentiated, complementary aesthetics technologies with a focus on collagen stimulation. Our products are experiencing significant growth as we target clinical demand for effective, high quality, longer duration, natural looking and minimally invasive treatments.
